Africana Studies Dec 25 2020 The third edition of *Africana Studies: A Survey of Africa and the African Diaspora* is an update of the second edition (1998) and incorporates new chapters that include expanded coverage of issues on women, health, terrorism, the African Union, and many others, as well as the most recent theories and methods in Africana studies. To date, *Africana Studies* remains the most comprehensive and most suitable text for both teachers and students interested in Africa and the Diaspora in the US, the Caribbean, Afro-Latin-America, and elsewhere. The book is divided into five parts: the state of the art of Africana studies; the evolution of the history of black people; analysis of the contributions of the black world; the present and future status of these peoples; and the societies and values of black people. The book also includes a chronology of significant events in the history of peoples of African descent and a number of maps. "[This book] attempts in one volume to present more accurately the experiences and contributions of the African world. It introduces readers to the most comprehensive account of black interdisciplinary subjects to date and summarizes the research of specialists in a variety of fields... The number of contributors, variety, and depth of coverage show that the work was carefully thought out." -- Insights, on an earlier edition

The Scramble for Africa Apr 09 2022 In 1870 barely one tenth of Africa was under European control. By 1914 only about one tenth – Abyssinia (Ethiopia) and Liberia – was not. This book offers a clear and concise account of the ‘scramble’ or ‘race’ for Africa, the period of around 20 years during which European powers carved up the continent with little or no consultation of its inhabitants. In her classic overview, M.E. Chamberlain: Contrasts the Victorian image of Africa with what we now know of African civilisation and history Examines in detail case histories from Egypt to Zimbabwe Argues that the history and background of Africa are as important as European politics and diplomacy in understanding the 'scramble' Considers the historiography of the topic, taking into account Marxist and anti-Marxist, financial, economic, political and strategic theories of European imperialism This indispensable introduction, now in a fully updated third edition, provides the most accessible survey of the ‘scramble for Africa’ currently available. The new edition includes primary source material unpublished elsewhere, new illustrations and additional pedagogical features. It is the perfect starting point for any study of this period in African history.

A Primer for Teaching African History Sep 02 2021 A Primer for Teaching African History is a guide for college and high school teachers who are teaching African history for the first time, for experienced teachers who want to reinvigorate their courses, for those who are training future teachers to prepare their own syllabi, and for teachers who want to incorporate African history into their world history courses. Trevor R. Getz offers design principles aimed at facilitating a classroom experience that will help students navigate new knowledge, historical skills, ethical development, and worldviews. He foregrounds the importance of acknowledging and addressing student preconceptions about Africa, challenging chronological approaches to history, exploring identity and geography as ways to access historical African perspectives, and investigating the potential to engage in questions of ethics that studying African history provides. In his discussions of setting goals, pedagogy, assessment, and syllabus design, Getz draws readers into the process of thinking consciously and strategically about designing courses on African history that will challenge students to think critically about Africa and the discipline of history.

The Illusion of the Post-Colonial State Sep 14 2022 This broadly interdisciplinary book offers deep insight into Africa's colonial history for an understanding and explication of contemporary governance crises, security challenges, and state failure on the continent. Critical management studies in the South African context Dec 13 2019 The purpose of this book is to establish the first formalised scholarly work on critical management studies (CMS) in the South African context. The book is a collection of seven chapters, six of which employ a conceptual methodology and one of which follows an interpretive paradigm employing qualitative methods of inquiry. CMS is a relatively young school of thought, arising in the early 1990s and still very much a peripheral movement within the academic discipline of management. South Africa has very little scholarship on CMS as precious few scholars work in this space. Furthermore, publication opportunities are virtually non-existent as CMS is virtually unknown in the South African community of management scholars. Thus, this book represents the first academic work on CMS published in South Africa, written and reviewed by scholars who are familiar with the field. The primary target readership would be management academics, but it could also be a useful reference for postgraduate students in management.

UNESCO General History of Africa, Vol. III, Abridged Edition Aug 01 2021 "The book first places Africa in the context of world history at the opening of the seventh century, before examining the general impact of Islamic penetration, the continuing expansion of the Bantu-speaking peoples, and the growth of civilizations in the Sudanic zones of West Africa"--Back cover.

Africa's Development in Historical Perspective Jan 14 2020 Why has Africa remained persistently poor over its recorded history? Has Africa always been poor? What has been the nature of Africa's poverty and how do we explain its origins? This volume takes a necessary interdisciplinary approach to these questions by bringing together perspectives from archaeology, linguistics, history, anthropology, political science, and economics. Several contributors note that Africa's development was at par with many areas of Europe in the first millennium of the Common Era. Why Africa fell behind is a key theme in this volume,

with insights that should inform Africa's developmental strategies.

Africa May 30 2021 What wove the African continent into the rich fabric of cultures and peoples that it is today? Where did ancient culture, trade and civilization begin? How did the African people survive and thrive despite European colonization and apartheid? These are just some of the questions you'll find answers to in *Africa: African History from Ancient Egypt to Modern South Africa*. Africa is a vast continent whose waters, fertile lands, minerals, and diverse wildlife nurtured humankind since ancient times until European colonization and exploitation caused immeasurable suffering and loss. To understand how Africa developed, thrived, suffered, and emerged into the rich tapestry of peoples that it is today, take a trip back to the ancient River Nile and the East African coast. Witness the development of small settlements into three distinct cultures ; the Carthaginian Empire grow and flourish as an economic and commercial power ; the settlement of the Zimbabwe plateau and the construction of enormous stone cities ; the emergence of the Kingdom of Kongo and its expansion through peaceful trade and alliances ; the upheaval, atrocities, wars, and eventual stability created by European colonization ; the founding of the Congo Free State and the growth of forced labor to extract valuable resources from the land ; the decolonization of Africa and the return of territorial sovereignty and independence ; the forced racial segregation under apartheid and the birth of a new constitution that ended it ; the founding of the African Union to establish norms across the continent.

African Social Movement Learning Mar 28 2021 "How social movements learn in struggle, produce knowledge, and provoke public paradigm shifts have become an important focus of critical adult education in our contemporary turbulent times. And yet, African social movements, and their learning are largely absent from this literature. This work, therefore, provides a rare and much needed African contribution to this field. *African Social Movement Learning: The Case of the Ada Songor Salt Movement* speaks to this gap in the literature, laying out an entry-point to an African-centered account of learning in struggle on the continent. However, this entry-point quickly turns to an in-depth sharing of one particular case of African social movement learning. Based on 9 years of research with the Ada Songor salt movement in Ghana, the book provides a detailed account of learning through defending communal access to West Africa's largest salt yielding lagoon in the face of local, national and global efforts to expropriate this resource. The book shares the knowledge production of the movement, as well as the ways in which the movement has restored its struggle to meet new challenges. Songs, tapestries, demonstrations, manifestoes, popular education approaches, and book production all feature in these efforts"--

Luka Jantjie Aug 13 2022 Luka Jantjie is today a largely forgotten hero of resistance to British colonialism. His place in South African history has tended to be overshadowed by events elsewhere in the region. This book attempts to redress the balance by recording his remarkable story. In 1870, at the beginning of the Kimberley diamond mining boom that was to transform southern Africa, Luka Jantjie was the first independent African ruler to lose his land to the new colonialists, who promptly annexed the diamond fields. His outspoken stand against the hypocrisy of colonial 'justice' earned him the epithet: "a wild fellow who hates the English". As the son of an early Christian convert, Luka was brought up to respect peace and non-violence; his boycott of rural trading stores in the early 1890s was perhaps the earliest use of non-violent resistance in colonial South Africa. His steady refusal to bow to colonial demands of subservience intensified the enmity of local colonists determined to 'teach him a lesson'. As many of his people succumbed to colonial pressures, Luka was twice forced to

take up arms to defend himself and his people from colonial attacks. His life ended in a dramatic and heroic last stand in the ancestral sanctuary of the Langeberg mountain range; its tragic consequences stretched far into the next century.

History of Africa Feb 19 2023 In a single volume, *History of Africa* offers readers a richly illustrated narrative introduction to the history of the entire continent, from earliest times through to the present day. Building on the book's established reputation and success, this third edition has been revised and updated throughout in the light of new research and recent events. A companion website now also supports the text. Kevin Shillington traces the history of the continent through the ancient world to medieval, modern and contemporary Africa. He explores the early emergence of farming; the kingdoms of Ancient Egypt, Aksum and Meroe; medieval empires; the spread and impact of Islam; the role of trade and religion; and the development of Africa's wide range of pastoral, agricultural and hunting societies. *History of Africa*, third edition: • contains nearly 100 specially-drawn maps and almost 200 illustrations, a number of which are new for this edition • takes a deliberately African viewpoint of the European involvement in Africa • provides a carefully constructed examination of the colonial period and the problems of post-colonial Africa • presents expanded coverage of modern Africa with more on issues such as economic concerns, globalization, international organisations, climate change, HIV/AIDS, and the role of China • opens with a new Introduction which includes a helpful historiographical overview • features a companion website offering additional historical debate and critical discussion to complement specific parts of the text; key points to remember for each chapter; a variety of essay questions and exercises; and other resources to enhance the learning experience. Eminently clear and approachable, *History of Africa* remains the essential text for anyone with an interest in this remarkable continent and its fascinating past.

Fortunes of Africa Jul 20 2020 In this vast and vivid panorama of history, Martin Meredith, bestselling author of *The State of Africa*, follows the fortunes of Africa over a period of 5,000 years. He examines, too, the fate of modern African states and concludes with a glimpse into their future. This is history on an epic scale.

Theorising Development in Africa Oct 23 2020 How come Africa is so underdeveloped when it is one of the richest continents on earth? Indeed, Africa is a paradox: it is poor and rich at the same time! Resource-wise, Africa is among the top richest continents in the world, yet development-wise it is the poorest of all continents. This paradox desperately needs comprehensive theoretical unpacking and rethinking if Africa is to achieve breakthroughs to the multifaceted development-related problems that have haunted it since the beginning of its unequal encounters with Europe. Regrettably, current Eurocentric development theories fall short on several fronts. The need for a comprehensive body of knowledge – theories and models – from the perspective of Africans persists in urgency. The present volume is an attempt to theorise Africa's [under-]development with a view to provide a sustainable enduring framework of operations that will arrest the elusive predicament of the continent while taking it forward from its current position of passivity. It rethinks and re-imagines a number of externally imposed problematic mechanisms used (un-)consciously in Africa, with the intention to raise awareness and foster critical thinking in scholars and scholarship on African development. With its predicament-oriented theorising, the book is a pacesetter on how to think and research Africa's [under-]development. It is also an invaluable asset for social scientists, policy makers, development practitioners, civil society activists and politicians.

Understanding Contemporary Africa Jan 26 2021 April Gordon (sociology, Winthrop U.) and Donald Gordon (political science, Furman U.) present a textbook written for use in introductory undergraduate courses on Africa. Chapters overview themes of politics, economics, international relations, demographics and disease, the environment, family and kinship, women and development, religion, and literature. One chapter is devoted to a more detailed examination of the history of South Africa. For the most part, the essays support the viewpoints of the former colonial powers and the international monetary institutions on

African history and development and it is likely that many African academics and political activists would suggest that this book would lead more to misunderstanding contemporary Africa. Annotation copyrighted by Book News, Inc., Portland, OR

How Europe Underdeveloped Africa Apr 28 2021 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

Understanding Leadership May 18 2020 Lao Tzu, Marx, the Buddha, Ibsen, Machiavelli — these are just a few of the world's great thinkers who have weighed in on the subject of leadership over the centuries. Yet, the contemporary student of leadership often overlooks many of these names in favour of more recent theorists hailing from the social sciences. *Understanding Leadership: An Arts and Humanities Perspective* takes a different angle, employing the works of the great philosophers, authors and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership. The authors build their conceptual framework using The Five Components of Leadership Model, which recognizes the leader, the followers, the goal, the environmental context, and the cultural values and norms that make up the leadership process. Supporting the text are a wealth of case studies which reflect on works such as Ayn Rand's novella *Anthem*, Eugène Delacroix's painting *Liberty Leading the People*, Charlie Chaplin's film *Modern Times*, Athol Fugard's play "Master Harold" . . . and the Boys, Lao Tzu's poetic work *Tao Te Ching*, and Antonín Dvořák's *New World Symphony*. The authors also introduce studies from various world cultures to particularly illustrate the role cultural values and norms play in leadership. This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem solving in a complex world. *Understanding Leadership: An Arts and Humanities Perspective* will be a valuable textbook for both undergraduate and postgraduate leadership students, while leadership professionals will also appreciate the book's unique liberal arts and cultural approach.

Power in Colonial Africa Nov 23 2020 Even in its heyday European rule of Africa had limits. Whether through complacency or denial, many colonial officials ignored the signs of African dissent. Displays of opposition by Africans, too indirect to counter or quash, percolated throughout the colonial era and kept alive a spirit of sovereignty that would find full expression only decades later. In *Power in Colonial Africa: Conflict and Discourse in Lesotho, 1870–1960*, Elizabeth A. Eldredge analyzes a panoply of archival and oral resources, visual signs and symbols, and public and private actions to show how power may be exercised not only by rulers but also by the ruled. The BaSotho—best known for their consolidation of a kingdom from the 1820s to 1850s through primarily peaceful means, and for bringing colonial forces to a standstill in the Gun War of 1880–1881—struggled to maintain sovereignty over their internal affairs during their years

under the colonial rule of the Cape Colony (now part of South Africa) and Britain from 1868 to 1966. Eldredge explores instances of BaSotho resistance, resilience, and resourcefulness in forms of expression both verbal and non-verbal. Skillfully navigating episodes of conflict, the BaSotho matched wits with the British in diplomatic brinkmanship, negotiation, compromise, circumvention, and persuasion, revealing the capacity of a subordinate population to influence the course of events as it selectively absorbs, employs, and subverts elements of the colonial culture. “A refreshing, readable and lucid account of one in an array of compositions of power during colonialism in southern Africa.”—David Gordon, *Journal of African History* “Elegantly written.”—Sean Redding, *Sub-Saharan Africa* “Eldredge writes clearly and attractively, and her studies of the war between Lerotholi and Masupha and of the conflicts over the succession to the paramountcy are essential reading for anyone who wants to understand those crises.”—Peter Sanders, *Journal of Southern African Studies*

Paradigm Shift in Language Planning and Policy Sep 21 2020 The book proposes a paradigm shift in language planning and language policy in Africa. For the past fifty years, the dominant model has been the hegemonic model whereby a language of wider communication (LWC) is imposed on minority languages. It is now time for a paradigm shift in favor of a more egalitarian model in which all the languages spoken in the same country, irrespective of their size, are planned. The paradigm shift concerns four critical areas: status planning, cost-benefit planning, acquisition planning, and corpus planning. Such a shift is justified for the following reasons: First, the hegemonic model has a dismal track record of success in Africa and elsewhere. Second, the hegemonic model exacerbates linguistic conflicts in many countries. Consequently, policy makers shun it for fear of jeopardizing the fragile social fabric in their respective countries. Last, a shift away from the hegemonic model is recommended because it is too costly to implement. The "democratic model" is undergirded by the Strategic Game Theory proposed by David Laitin. It forecasts a 3±1 language outcome for most African countries. This outcome supports the "three language formula" now called for by the United Nations Development Program (UNDP).

The end of colonial rule : nationalism and decolonization Feb 24 2021 In this fourth volume of the Africa series, Falola presents various aspects of African history and culture from the period of World War II to the time when African countries became free of European rule. The book's primary aim is to present the

broad picture of Africa in the last decades of colonial rule. The theme of nationalism occupies a prominent place: four chapters are devoted to its analysis, including the contributions of women, which have generally been ignored. This period of African history was also a time of reform, when Africa actually began to see significant changes. Various chapters are devoted to those reforms and other important social aspects of the time, notably health, business, and education. The authors pay attention to the role of Africans in initiating some of these major changes. In the second part of the book, the themes are analyzed chronologically, focusing on each region in turn. The final part reflects on what colonialism meant for Africa, both during the period of European rule and since independence. The concluding chapters prepare the reader to understand contemporary Africa, which is covered in Volume 5, the last in the series. This is the fourth volume in a series of textbooks entitled Africa. Contributors to the volumes are African Studies teachers from a variety of schools and settings. Writing from their individual areas of expertise, these authors work together to break stereotypes about Africa, focusing instead on the substantive issues of the African past from the perspectives of Africans themselves. The organization of the books is flexible enough to suit the needs of any instructor, and the texts include illustrations, maps and timelines to make cultural and historical movements clearer. Suggestions for further reading that will help students broaden their own interests are also included. Africa challenges the accepted ways of studying Africa and encourages students who are eager to learn about the diversity of the African experience. "...[T]his volume delivers the goods wonderfully well. Its strength lies in its readability for the target audience. Its writers are interested in communicating and bear their expertise gently." -- Journal of African History, Volume 45, 2004
