Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. Hailed as a groundbreaking and important textbook upon its initial publication, the latest iteration of Product Design for Manufacture and Assembly does not rest on those laurels. In addition to the expected

updating of data in all chapters, this third edition has been revised to provide a top-notch textbook for university-level courses in product design and manufacturing design. The authors have added a comprehensive set of problems and student assignments to each chapter, making the new edition substantially more useful. See what's in the Third Edition: Updated case studies on the application of DFMA techniques Extended versions of the classification schemes of the features of products that influence the difficulty of handling and insertion for manual, high-speed automatic, and robot assembly Discussions of changes in the industry such as increased emphasis on the use of surface mount devices New data on basic manufacturing processes Coverage of powder injection molding Recognized as international experts on the re-engineering of electro-mechanical products, the methods and guidelines developed by Boothroyd, Dewhurst, and Knight have

been documented to provide significant savings in the product development process. Often attributed with creating a revolution in product design, the authors have been working in product design manufacture and assembly for more than 25 years. Based on theory yet highly practical, their text defines the factors that influence the ease of assembly and manufacture of products for a wide range of the basic processes used in industry. It demonstrates how to develop competitive products that are simpler in configuration and easier to manufacture with reduced overall costs. Manol is an incredible journey of a young man in the late sixties who struggles with the inevitable fact that he has to go to Vietnam. His wild ride after graduation from high school and his tour in the Army is a part of history that the government would like to forget. Vietnam was not all guns and jungles, the other side of the war was just as dangerous. Drugs and race relations in the rear echelons

made survival difficult. A soldier had to find a way to cope with the 365 day tour; and Manoi a puppy; was one soldier's answer. A trusting companion and friend he couldn't leave behind. This unique e-book collection is comprised of the best U.S. military rifle & sniper handbooks. It provides guidance for the training on different types of rifles (M 24 Sniper Weapon System, M16A1, M16A2/3, M16A4 & M4 Carbine) and all other necessary information needed to become an exceptional rifleman. Get to know characteristics of diverse weapons, ammunition and accessories, master the rifle marksmanship and ballistics, develop field skills and mission planning abilities.
