Annotation This volume is one in a series initiated by the United Nations University Institute of Advanced Studies on the inter-relationship between globalisation and urban transformation. It identifies and describes the inter- and intra-urban transformations of Central and Eastern European cities and considers their pre-1945 historic legacies, the socialist

period, and their contemporary transition towards market oriented and democratic systems. The dramatic changes since 1989 including the collapse of Communist ideology, the break-up of the Soviet Union, Czechoslovakia and Yugoslavia, the end of the Cold War and the impact of globalisation and European integration, have reconfigured this region and affected their re-integration into European and global networks. This book first examines the similarities and differences between significant Central and Eastern European cities, comparing the differing patterns of historical context and socialist legacies before 1990, and the impacts of internal and external forces on re-shaping these cities and their paths of transformation since 1990. It also examines the role of contemporary planning within the overall development of Central and Eastern European cities. The conclusion demonstrates the similarities and differences between Central and Eastern European cities and their re-integration into global networks. Sovjetiske indflydelsessfærer syntes at have gennemgået forandringer, og forfatteren mente, at Stalins rige var ved at gå i stykker. This key volume provides a thorough and well-structured post-communist study of political finance, election campaign and party funding issues within eleven Central and Eastern European countries. It will be indispensable for anyone interested in the efficiency of regulation in party funding. The systematic transformation from planning and bureaucratic co-ordination to a liberal private capitalist economic order has been a historic challenge for Central and South-East European countries. It was inevitable that following the post-revolutionary euphoria there would be a period of gathering stock as the true dimensions of the crisis came to be appreciated. What is clear is that the road from crisis to capitalism will be long and bumpy and this book focuses on some of the key policy-relevant theoretical issues of strategic transformation. In doing this the contributors compare the situation in East Europe with non-European experience - particularly that of Latin America - and attempt to establish a basis for redesigning and consolidating the crisis-ridden Central and Eastern European States. This book offers a comparative study of the Central and Eastern European and Turkish economies that analyses the implications of EU enlargement. The contributors discuss issues related to the creation of a legal infrastructure that encourages entrepreneurial initiative, fair competition, market forces and

investor confidence. They assess the benefits of following prudent monetary and fiscal policies together with appropriate competition, trade and foreign direct investment policies in Turkey and Central and Eastern Europe. The demise of state Socialisms caused radical social, cultural and economic changes in Eastern Europe. Since then, young people have been confronted with fundamental disruptions and transformations to their daily environment, while an unsettling, globalized world substantially reshapes local belongings and conventional values. In times of multiple instabilities and uncertainties, this volume argues, young people prefer to try to adjust to given circumstances than to adopt the behaviour of potential rebellious, adolescent role models, dissident counter-cultures or artistic breakings of taboo. *Eastern European Youth Cultures in a Global Context* takes this situation as a starting point for an examination of generational change, cultural belongings, political activism and everyday practices of young people in different Eastern European countries from an interdisciplinary perspective. It argues that the conditions of global change not only call for a differentiated evaluation of youth cultures, but also for a revision of our understanding of 'youth' itself - in Eastern Europe and beyond. This incisive report identifies and describes the major policy choices to be made and discusses what will work and what will not.

Excerpt from *The Market for U. S. Soybeans and Soybean Meal in Eastern Europe*

The Eastern European countries covered herein include Bulgaria, czechoslovakia; -east Germany, Hungary, Poland, Romania, and Yugoslavia. Soybeans and soybean products are among the small number of u.s. Agricultural products that are now moving to these countries under developing dollar trade terms. This is because soybean meal has become a highly desired ingredient in the feeds used in their expanding poultry, hog, and other livestock industries. The acknowledged high quality of u.s. Soybean meal and the excellent results achieved with it point to the enlargement of the East European market simultaneously with the further development of these industries. If present trade conditions prevail, these countries could more than double their current imports of u.s. Soybeans and products in the next 5 years. Trade barriers are not a problem in this trade because the government import monopolies in East Europe are quite anxious to buy u.s. Soybean meal and soybeans. While import licenses are necessary in most of these countries, the government monopolies secure their own licenses.

The necessary foreign exchange also is provided for because the imports are made in accordance with government plans. Nevertheless, availability of foreign exchange, which is limited and controlled, is often a problem, particularly this year in Czechoslovakia. To Eastern Europe's growing soybean and soybean meal market (excluding East Germany) the United States shipped the equivalent of metric tons of meal and beans, in terms of soybeans, in 1969; this was four times the average amount shipped in the 1960 - 64 period. Actual shipments were metric tons of meal and tons of beans; in terms of meal, the total was tons. During the 1960 - 64 period, an average of metric tons of meal and beans were shipped, in terms of soybeans, or tons of meal and tons of beans. Focus on Germany, Hungary, the Russian Federation, Bulgaria, Poland, Czechoslovakia, and Slovenia. This text covers five topics about journalism: its roots in East/Central Europe and former Soviet Union; its role and effect leading up to the events of 1989; the transition period; the contributions, trials and tribulations from 1989-1996; and the state of journalism education in these regions. Arguably more than any other region, the area known as Eastern Europe has been defined by its location on the map. Yet its inhabitants, from statesmen to literati and from cultural-economic elites to the poorest emigrants, have consistently forged or fathomed links to distant lands, populations, and intellectual traditions. Through a series of inventive cultural and historical explorations, Eastern Europe Unmapped dispenses with scholars' long-time preoccupation with national and regional borders, instead raising provocative questions about the area's non-contiguous-and frequently global or extraterritorial-entanglements. The collected essays in this book deal with scientific experiments about a real one: the transition from communism to democracy, and the transformation

of command to market economies in Central and Eastern Europe. In the first part of the volume core issues involved in the breakdown and transformation of these nations are raised, among others the sequencing of economic reforms and conditions leading to political system breakdown and reconstruction. Simulation models in economics and political science which might be useful to explore systematically the complexity and dynamics of transformation processes are reviewed. Simulation experiments using such models are presented in the second part analyzing alternative developmental paths of the societies in Central and Eastern Europe. Will some of the Eastern European nations be able to integrate into the world economy? How will Poland achieve the transition from a supply to a demand driven economy? What are the implications of the transition to democracy for the former GDR for political stability? And to what extent will the former GDR economy be able to catch up with that of the former FRG? Finally, data availability and quality for systematically reconstructing past developments and analyzing present trends is discussed in detail. Cabinets in Eastern Europe is a comprehensive study which enables the reader to compare the origins, structure, composition and activities of these cabinets and to draw lessons from this comparison. Each chapter begins with a survey of the evolution of cabinets since the fall of communism at the beginning of the 1990s. The emphasis is then laid on the place of the cabinet in the constitution and on the role of presidents and prime ministers in the formation of the life of each cabinet. At a time when most Eastern European countries are candidates for membership in the European Union, this volume provides a unique comparative presentation of the way in which cabinets have been evolving in Eastern Europe since the end of communism. Find out which business teaching techniques work and which don't for Central and Eastern European students

From editor George Tesar: "Educational opportunities in Central and Eastern Europe have changed dramatically over the last twelve years. The restructuring of undergraduate and graduate programs has required a systematic rethinking of programs, courses, and teaching methods. Postgraduate education--particularly professional education and especially management education--has evolved as one of the most important elements impacting the political, social, and economic changes in that part of the world." With this essential book, you'll explore the latest international business and management

concepts that are being taught to potential managers and executives in Eastern and Central Europe. Edited by an internationally recognized expert in business management and education, *International Business Teaching in Eastern and Central European Countries* examines the way the economic structures of nations in transition impact the management curriculum, and looks at ways to stimulate economic development in transition economies. This thoughtfully indexed, well-referenced book also: illuminates the learning process for business students in that region suggests ways to help Eastern and Central European students get the most from case studies and business game simulations explores ways to use collaborative learning instruments when teaching entrepreneurship shows how to use networking as a vital part of increasing the management knowledge of a community or nation examines how existing companies can be used as business laboratories for teaching discusses the roles of free-market processes and government intervention in transition economies This second volume in a series of books on democratic consolidation in Eastern Europe analyzes the external parameters of such a consolidation in thirteen Eastern European countries. It explores how different international actors and various economic, cultural, and security types of transnational pressures have shaped democratic politics in the region, especially over the last decade.

Byzantium in Eastern European Visual Culture in the Late Middle Ages focuses on how the heritage of Byzantium was continued and transformed alongside local developments in the artistic and cultural traditions of Eastern Europe between the fourteenth and sixteenth centuries. Reaching back centuries, this study makes a convincing case for very deep roots of current Eastern European backwardness. Its conclusions are suggestive for comparativists studying other parts of the world, and useful to those who want to understand contemporary Eastern Europe's past. Like the rest of the world except for that unique part of the West which has given us a false model of what was "normal," Eastern Europe developed slowly. The weight of established class relations, geography, lack of technological innovation, and wars kept the area from growing richer. In the nineteenth century the West exerted a powerful influence, but it was political more than economic. Nationalism and the creation of newly independent aspiring nation-states then began to shape national economies, often in unfavorable ways. One of this book's most important

lessons is that while economics may limit the freedom of action of political players, it does not determine political outcomes. The authors offer no simple explanations but rather a theoretically complex synthesis that demonstrates the interaction of politics and economics. In this thought-provoking book, Nikolai Genov presents a systematic description and explanation of Eastern European societal transformations after 1989 as a consequence of global trends. "How does democracy work in the new democracies of Eastern Europe? Do the people actually rule as one would expect in a democracy or do the legacies of communism and the constraints of the transition weaken popular control? This book presents a new framework for conceptualizing and measuring democratic quality and applies this framework to multiple countries and policy areas in the region. It defines democratic quality as the degree to which citizens are able to hold leaders accountable for their performance and keep policy close to their preferences. Its surprising conclusion, drawn from large-N statistical analyses and small-N case studies, is that citizens exercise considerable control over their rulers in Eastern European democracies. Despite facing difficult economic circumstances and an unfavorable inheritance from communism, these countries rapidly constructed relatively high-quality democracies"--Provided by publisher. At the end of 1991, the Fondazione Eni Enrico Mattei hosted the Integration Symposium of the Confederation of European Associations of Economists on "Europe between East and South". This volume brings together the selected and edited proceedings of the conference. The focus of the book is the transformation of the formerly planned economies in Eastern and Central Europe from an international perspective. The opening up of the Eastern bloc adds a new and extremely challenging dimension to the relationship between the more and the less developed economies. Almost all developing countries implemented liberalisation policies throughout the Eighties, thereby dramatically increasing the market orientation of their economies. The "recipes" used in the South are also being applied virtually unmodified, in Eastern Europe. The symposium was one of the first forays comparing the two sets of experiences, showing that the lessons from the South are of great value for Eastern European reforms. Reforms in Eastern European countries equally affect economic flows between Europe and developing countries, and create new challenges for European countries themselves. Eastern Europe is an enclave of cheap and relatively skilled labour, thus a dramatic competitive threat for other developing countries and poorer EC regions. Furthermore, the strategic relevance of this area for the western world is likely to cause a diversion of public resources previously earmarked for the development of southern economies. All these issues could have tremendous consequences for the environment. Media Transformations in the Post-Communist World: Eastern Europe's Tortured Path to Change, edited by Peter Gross and Karol Jakubowicz, is a collection of analyses of Eastern European media by some of the most distinguished scholars in the field. This text assesses the progress (or lack thereof) made in transitioning and transforming the mass media in Eastern Europe since the fall of Communism. This collection reveals how democratic political change offers an opportunity, but not a guarantee, of successful corresponding change in the media system. The 1989 fall of communism in Eastern Europe occurred in

a period when Western intellectuals were involved in a confusing discourse on a number of other dramatic endings: the end of modernity, the end of the century, even the possible end of sociology. Against this backdrop, the authors focus on continuities based on the "habits of the heart" of those who threw off communism in Eastern Europe, contrasting them with Western modes of thought. Their cultural explanation draws on theories of Tocqueville, Durkheim, and others to examine positive as well as negative aspects of the nations that survived communism. While focusing on the Balkans, they also make cautious prognoses for the rest of Eastern Europe. The Routledge Handbook of East European Politics is an authoritative overview that will help a wide readership develop an understanding of the region in all its political, economic, and social complexity. Including Central Europe, the Baltic republics, South Eastern Europe, and the Western Balkans, as well as all the countries of the former Soviet Union, it is unrivalled in breadth and depth, affording a comprehensive overview of Eastern European politics provided by leading experts in the fields of comparative politics, international relations, and public administration. Through a series of cutting-edge articles, it seeks to explain and understand patterns of Eastern European politics today. The Routledge Handbook of East European Politics will be a key reference point both for advanced-level students developing knowledge about the subject, researchers producing new material in the area, and those interested and working in the fields of East European Politics, Russian Politics, EU Politics, and more broadly in European Politics, Comparative Politics, Democratization Studies, and International Relations. In this ambitious work, Bennett Kovrig lucidly traces the economic, political and ideological developments that have characterized U.S. relations with Eastern Europe since World War II. Kovrig provides a refreshingly objective examination of the complex evolution of events that led to the end of the cold war. His account of the days prior to America's global confrontation with the U.S.S.R. when U.S. interests in Eastern Europe were minimal, of the economic and psychological warfare of the cold war, and of the growing diversity of Eastern European nations that contributed to the upheavals of 1989 offers a rich and comprehensive background to the current scenario. From Eastern Europe' is a collection of work from some of the most talented designers,

agencies and illustrators in this region? such as Anna Kulacheck, The Bakery, AKU, Dima Pantyushin, Metaklinika and many more. It is the aim of this volume to investigate how academic practices of Memory Studies are being applied, adapted, and transformed in the countries of East-Central Europe and the former Soviet Union. It affords a new, startlingly different perspective for scholars of both Eastern European history and Memory Studies. Fundamental shifts in Eastern European tax policy
