The European Yearbook promotes the scientific study of nineteen European supranational organisations and the OECD. Each volume contains a detailed survey of the history, structure and yearly activities of each organisation and an up-to-date chart providing a clear overview of the member states of each organisation. Engineering Equipment for Foundries covers the proceedings of the Seminar on Engineering Equipment for Foundries and Advanced Methods of Producing such Equipment, held in Palais des Nations in Geneva, Switzerland on November 28-December 2, 1977. This seminar is organized by the United National Economic Commission for Europe. This book is organized into five parts encompassing 39 chapters. Part I focuses on the economic

problems of the foundry industry, particularly in connection with reduction of labor requirements and in calculating foundry production capacity. Part II highlights the problem of environmental pollution created by different branches of metallurgy, while Part III deals with the general problems concerning practices and technological developments in the foundry industry. Part IV describes the technological advances in molding and coremaking processes in foundry. This part also discusses the reduction of waste energy in permanent mold and die-casting foundries. Part V considers the transition to process and production automation of foundry equipment. This book will prove useful to metallurgical engineers, manufacturers, and researchers. The "European Yearbook promotes the scientific study of nineteen European supranational organisations and the Organisation for Economic Co-operation and Development (OECD). Each volume contains a detailed survey of the history, structure and yearly activities of each organisation and an up-to-date chart providing a clear overview of the member states of each organisation. Each volume contains a comprehensive bibliography covering the year's relevant publications. In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche. Contrairement aux adeptes de l'instruction publique que sont les Français, les Anglo-saxons ont une conception de l'enseignement qui inclut à la fois l'instruction et l'éducation, l'objectif étant toujours de former un individu accompli dans la tradition des acquis du Liberal Arts Education . Raison pour laquelle, la religion est

demeurée longtemps une discipline à part entière dans le curriculum de l'enseignement dans la partie anglophone du Cameroun. Il faut cependant garder à l'esprit qu'au-delà de ce qui peut apparaître comme approches discordantes des missionnaires chrétiens en situation coloniale, catholiques, protestants et autres presbytériens semblent avoir été toujours d'accord sur la nature sacrée de leur mission de conversion et de diffusion de la civilisation occidentale en pays de mission. Dommage que les dirigeants camerounais n'aient jamais réussi à s'inspirer de la démarche ci-dessus et à adopter une ligne de conduite un tant soit peu patriotique. Les politiciens postcoloniaux ont constamment fait montre d'un déconcertant opportunisme. Il peut certes leur arriver de solliciter publiquement ou officieusement l'Eglise à travers ses princes locaux pour accompagner les pouvoirs publics dans la résolution des conflits sociopolitiques. Mais par moments, ils n'hésiteront pas à leur rappeler que l'Eglise ne doit pas se mêler de politique. Elle doit se cantonner dans les affaires spirituelles, oubliant l'un des enseignements les plus mémorables de Mgr Ndongmo, à savoir qu'on ne peut pas conduire les hommes au ciel comme si la terre n'existait pas.

The English-French volume of the International Dictionary of Refrigeration contains approximately 4400 terms with their definitions in the 2 official languages of the International Institute of Refrigeration, English and French. Approximately 200 experts, who are members of the IIR network and are from about 30 countries on all the continents, took part in the development of the Dictionary. The terms are allocated to 11 chapters: Fundamentals - Refrigeration and Production - Refrigerating Equipment - Cooling Methods - Storage, Transport, Distribution - Refrigeration of Perishable Products - Air Conditioning - Heat Pumps - Cryology - Other Applications of Refrigeration - Refrigeration and the Environment. The terms are classified in alphabetical order within 110 sections. An alphabetical index in English and another one in French make it easy to perform searches for terms and their synonyms. 9 volumes will be published containing the terms alone in 9 languages, with the corresponding English and

French equivalents: Arabic, Chinese, Dutch, German, Italian, Japanese, Norwegian, Russian and Spanish. (Now published) The volume anglais-français du Dictionnaire International du Froid comporte environ 4400 termes avec leurs définitions dans les deux langues officielles de l'Institut International du Froid (IIF). Pres de 200 experts, membres du réseau de l'IIF, appartenant à une trentaine de pays de tous les continents, ont participé à l'élaboration du Dictionnaire. Les termes sont regroupés dans 11 chapitres: Principes de base - Production de froid - Installations frigorifiques - Méthodes de refroidissement - Entreposage, transport, distribution - Application du froid aux produits périssables - Conditionnement d'air - Pompes à chaleur - Cryologie - Autres applications du froid - Froid et environnement. Les termes sont classés par ordre alphabétique en anglais dans 110 sous-chapitres. Deux index alphabétiques, en anglais et en français, permettent de trouver rapidement les termes recherchés et leurs synonymes. Neuf fascicules vont être publiés avec uniquement les termes en neuf langues, en correspondance avec les termes anglais et français : allemand, arabe, chinois, espagnol, italien, japonais, néerlandais, norvégien et russe (publiés). Analyse: Banque cantonale vaudoise: p. 1072-1078. Environmental problems ignore international boundaries. Toxic wastes travel by water and air, sometimes displacing the effects of an environmental disaster entirely outside of its country of origin. It is now understood that to overcome the problems that face us international co-operation is required. This important work is designed to assist in that process, by helping to break down the language barriers that stand between countries. The manual, written in parallel English, German, French and Russian texts, provides the basic tools of communication in the specialized fields of environmental sciences between speakers of these languages. Each chapter has been revised in each separate language by specialists in the field to guarantee the authenticity of the information presented. The author is unique in his approach, presenting the key-words in context, as opposed to simple glossary entries, allowing the reader to fully understand the complex relations between the word and the concepts involved. A comprehensive index

written in all four languages guides the reader through the text, providing references to the words as they are used in different disciplines. In cases where, in one language, a particular term is applicable to several professions, industries, etc. while the foreign equivalent varies according to the industry, etc. in which it is used, the particular branch of industry is noted in parenthesis in accordance with the "Explanations of Abbreviations and Signs" given at the beginning of the book. This reference has, however, been omitted where there can be no doubt as to the industry, etc. covered by the term. Expressions which are preferred, or are used almost exclusively, in the United States, are marked (A). I would like to sincerely. This publication is a two-yearly report on trends in the steelmaking capacity in economies that are not members of the OECD. This report examines the current steelmaking capacity of these economies and likely changes therein up to the year 2012. The "European Yearbook" has expanded over the years in keeping with the role played by European institutions compared with national ones. It is an indispensable work of reference for anyone dealing with these institutions, which have become so numerous and varied that no-one can possibly memorise all their acronyms or functions. The "European Yearbook" provides aids for finding one's way through the labyrinth of these organisations which coordinate a variety of activities in over 20 countries. One of the aids is an 'organisation chart' at the beginning of the documentary section, giving a clear picture of the general situation. A perusal of the many contributions in the volume organisation by organisation, shows the full diversity of the activities which Europe is gradually taking over from national governments, with their consent and financial support. Written in both of the Council of Europe's official languages, English and French, the "European Yearbook" also contains a general index by subject and name which constitutes a very valuable list of articles and provides direct access to the work's subject matter, regardless of the particular organisation concerned, offering a kind of cross-section of the activities of European organisations. The aim of the biennial series of symposia on Fusion

Technology organized by the European Fusion Laboratories, is the exchange of information on the design, construction and operation of fusion experiments and on the technology being developed for the next-step devices and fusion reactors. The coverage of the volume includes the technological aspects of fusion reactors in relation to new developments, thus forming a guideline for the definition of future work. These proceedings comprise three volumes and contain both the invited lectures and contributed papers presented at the symposium, which was attended by 569 participants from around the globe. The 343 papers, including 12 invited papers, characterise the increasing interest of industry in the fusion programme, giving a broad and current overview on the progress and trends fusion technology is experiencing now, as well as indicating the future for fusion devices. Expert Oracle GoldenGate is a hands-on guide to creating and managing complex data replication environments using the latest in database replication technology from Oracle. GoldenGate is the future in replication technology from Oracle, and aims to be best-of-breed. GoldenGate supports homogeneous replication between Oracle databases. It supports heterogeneous replication involving other brands such as Microsoft SQL Server and IBM DB2 Universal Server. GoldenGate is high-speed, bidirectional, highly-parallelized, and makes only a light impact on the performance of databases involved in replication. The authors share their experience in the form of tutorials on designing and implementing all types of Oracle GoldenGate environments. You'll learn methods for tuning Oracle GoldenGate performance. You'll discover GoldenGate's utility as a migration and extract, transform, load (ETL) tool. You'll learn to configure highly-available environments involving GoldenGate, Real Application Clusters, and Data Guard. From installation to design to implementation and troubleshooting, Expert Oracle GoldenGate helps you master all aspects of using and applying Oracle GoldenGate as the replication tool of choice in your environment. Explains all aspects of using GoldenGate for replication Covers homogeneous, heterogeneous, and bidirectional replication Shows the use of GoldenGate for data migration and extract,

transform, load (ETL) Proceedings of the European Control Conference 1991, July 2-5, 1991, Grenoble, France This report on steel capacity developments in non-OECD countries is done every two years. It reviews available material on existing capacity and on likely developments through 2004. Popular Mechanics inspires, instructs and influences readers to help them master the modern world.
